

7 Simple Reasons to use AppFuse

Matt Raible, Virtuas Open Source Solutions mraible@virtuas.com

Introductions

- Your experience with Java?
- Your experience with Web Frameworks?
- What do you hope to learn today?
- Open Source experience: Ant, Struts, WebWork, Spring, Hibernate, Eclipse, Tomcat?
- Favorite IDE? Favorite OS? Favorite Server?

Agenda

- 1. AppFuse Overview
- 2.7 Simple Reasons
- 3. Competitors
- 4. Roadmap
- 5. Pitfalls
- 6. Q and A

AppFuse Overview

- A directory structure, build file and project classes to get your project started quickly
- The hard part is getting started and configuring dependencies
- Uses popular open-source tools: Ant, XDoclet, Spring, Hibernate, Struts (or JSF, Spring MVC, WebWork or Tapestry)
- Top 5 java.net project in hits, accesses and mail traffic

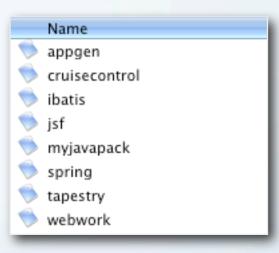

History

- Started as a sample app for Pro JSP
- Became a toolkit for starting new projects
- Lots of community feedback makes it a "best practices" webapp for Agile J2EE
- Documentation and Tutorials (November 2003)
- AppGen CRUD made easy (November 2004)
- New Committers: Nathan, Ben, David and Sanjiv (2005), Mika and Thomas (2006)
- AppFuse 2.0: Java 5, Maven 2, Simplicity (2006-7)

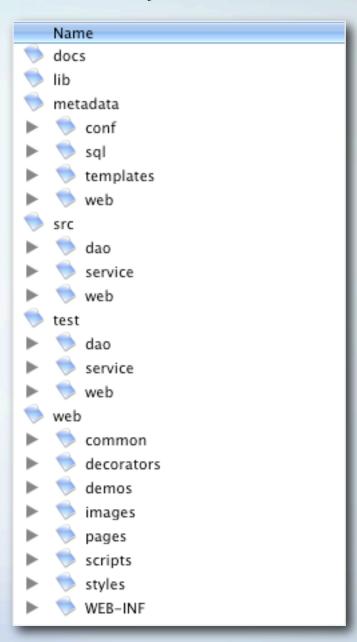

Dependencies

Roadmap

2.0 Roadmap

Milestone 1

- Maven 2 integration
- Migrate from CVS to SVN
- Get all flavors (WARs) deployed and running on Tomcat and Jetty Maven Plugin
- Spring 2.0: Upgrade XML to XSDs, annotations where appropriate
- Upgrade WebWork to Struts 2
- Documentation move to new Confluence or DocBook-based system for 2.0 documentation

2.0 Roadmap, cont.

Milestone 2

- JDK 5, Annotations and JSP 2.0
- Archetypes for creating new AppFuse projects
- Documentation, including screencasts for tutorials

■ Milestone 3

- Integrate CeltiXFire by default
- Code Generation replacing AppGen

2.0 Nice to haves

- TestNG replacing JUnit
- Hibernate Validation Annotations (hard part is hooking it into the web frameworks)
- Tomcat Plugin for Maven (like Jetty's plugin)
- JPA Support
- Support for JDK 1.4 using something like Retroweaver
- Support for using Ant to build/test/deploy

Pitfalls and Issues

Equinox

- AppFuse Light designed for quick apps with few requirements (i.e. prototypes)
- Includes 6 MVC implementations: JSF, Spring MVC, Struts, Struts 2, Tapestry and WebWork
- Includes 5 Persistence frameworks: Hibernate, iBATIS, JDO, OJB, Spring JDBC
- 50 combinations available!
- Located at http://equinox.dev.java.net
